

STONY PLAIN SUN.

VOLUME TEN

STONY PLAIN, ALBERTA THURSDAY, MAY. 29, 1930

Whole Number 512

THE SCHOOL ACT.

This Act has been turned down at every meeting of School Trustees, Municipal Officers and Teachers held since the Act was brought forward.

Are you in favor of removing all real authority from the local authorities and placing it directly under the Minister?

Are you in favor of having the control of the taxes and the hiring of the teacher taken away from you?

The School Act passed two readings and was only withdrawn because the Government could not face the people with it on the statute books.

If the Government is returned, the Act will be made law.

If you object to this Act

VOTE FOR BRYAN THE LIBERAL CANDIDATE.

The U.F.A. Convention

Several odd occurrences were recorded at the big convention on Friday in Moose Hall; the whole affair culminating in the big surprise of the meeting—the choosing of Donald McLeod of Lake Isle to contest Stony Plain Constituency in the interests of the United Farmers.

The convention was called to order by U. F. Director Glen Storey, and when nominations were called for a chairman, the choice fell on Mr H. E. C. Scholfield, vice-president of the U.F.A. Mr Joe Best was elected secretary to the meeting.

The first business was the reorganization of the Constituency Political association. Mr Broadstock was elected Pres., R. C. Propp Vice-Pres. The Directors are the presidents of the Locals in the constituency.

Seve al other business matters were attended to; after which Messrs M. McArthur of Magnolia, W. F. Broadstock of Woodbend, and McDonald of Holborn were appointed a credential committee, and also took charge of the balloting.

When nominations were called for the choice of a candidate, the name of E. C. McLaughlin was proposed by W. A. Ries; W. M. Washburn, by H. J. McDonald; C. Pitzler, by H. Woodyly; Donald McLeod, by M. McArthur.

The nominees were allowed ten minutes each on the platform to set forth their views.

In the 10-minute oratorical contest the laurels were easily won by Mr McLeod, who expressed his views in a convincing manner.

When the first ballot was taken it was found there was one ballot too many. This was rectified by allowing the two delegates to sit from the Local in dispute.

The chairman instructed delegates that choice would be made by simple ballot—low man drop out each count.

The result of first ballot showed Pitzler low man, and he was dropped. McLaughlin was dropped on the second ballot.

When the third ballot was taken the captain of the scrutineers reported one ballot short. This was found to be owing to the mistake of Mr Broadstock, who was a delegate and also a scrutineer, and who had forgotten to deposit his ballot.

This left the situation rather awkward, as the choices had been taken before the ballots were counted—with the result that McLeod was shown to have 15 votes, as also had Mr Washburn. There was a call for Broadstock to vote, but he, very properly declined.

Chairman Scholfield expressed himself as being in somewhat of a dilemma, but negatived the suggestion that he cast the deciding vote. A motion carried that a ballot be taken, with Broadstock voting. The result of this ballot showed McLeod the choice—17 to 14.

A Hobby Essential To Life

Every person, old or young, should have a hobby. And why a hobby? Because a hobby means an interest beyond the mere task of making a living and because an interest is necessary to the enjoyment of life.

Life without interest would be a dull, prosaic affair. Yet there are some people who keep their noses to the grindstone day after day, year in and year out in a dull routine to provide the wherewithal to feed, clothe and shelter themselves and their dependents, without a let-up from daylight to dark. They never look around for some interest which will serve to brighten their lot and bring joy into their lives.

There are, of course some men who are fortunate enough to have found in their vocation that keen zest which an outside interest gives to others, but it has been found by age-long experience that even such happily circumstanced individuals can and do pursue their work with better results and with greater contentment and less wear and tear when, to their work, they add a hobby.

"All work and no play makes Jack a dull boy" has been quoted so often that it has become platitudinous. Yet it is just as true today as when it was first uttered.

When the child puts his books away and closes his school desk for the day, he proceeds to enjoy himself with games and recreation in some form or another and in this manner revivifies himself for another day at scholastic tasks. Educators have discovered that the child who plays in reason brings to his school work an enjoyment which enables him in the long run to outstrip the pale faced bookworm. He has a balanced and therefore a happy existence and this reflects favorably upon his studies.

And so with the adult. But in place of flying kites or indulging in boisterous play, the grown up carries his enthusiasm into the field of some avocation, but just an stimulating amusement. It matters little whether it be collecting postage stamps, indulging in politics, playing saw and hammer or engaging in some form of academic study, so long as it is something which arouses the interest of the participant and whets his appetite for more; and so long as it is something different from the daily task.

It is this creation of interest which acts as a stimulus to the mind or a recuperative power to the physical being. It is at the same time restful and invigorating. This is why the individual with a second string to his bow, even if he be only used for recreational purposes, is more likely to make a success of life than one without it. He is able to turn again to the serious work of making a living with the hope and joy which comes with a buoyant spirit, a rested body and a clear, refreshed mentality.

It is impossible to pursue a hobby without securing these results, provided it is kept within reasonable bounds, for recreation broadens interest and interest means life. Interest with existence is life. Life without interest is mere existence.

The time to develop interest is in youth. It is too late to wait until the pains and penalties of advancing years are taking their toll and forcing retirement from active work. The individual who waits until he is obliged to slacken the traces on which he has been pulling heavily for decades before looking around for an interest will find he faces an old age of misery, for he has developed nothing to which he can turn to make his declining years worth living.

The youth, the middle aged, the old, of both sexes should have a hobby and should develop a hobby in comparatively early life.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

An Accidental Discovery

Scientists Find Fish Scales Can Be Tied As Fabric Coating

For hundreds of years Eve has taken her clothes from the wool of sheep and the skins of animals, but now she has gone one better—she is to wear the scales of fish.

Soon the smartest Eves will shimmer like mermaids. A firm at Stony Plain has at last patented a process by which fish scales can be used as a coating for various fabrics. Among many advantages is that the new material has a remarkable power of keeping out heat.

It is intended, also, to use a coating of artificial pearl on thin olefin coats. These latest rain-proof garments will be light and completely waterproof, and when wet they will have a beautiful pearly glitter.

The discovery that fish scales could be used for this novel purpose was more or less accidental. Scientists were endeavoring to improve the process by which artificial pearls are made when they stumbled across the new idea.

After several attempts they found a method of washing, drying and grinding fish scales which produced a fine crystalline powder. This is mixed with a solution of artificial silk in collodion, and can be painted thinly over the oil skin.

Reindeer Trek Halted

Will Not Resume Journey Until Fawns Can Travel

Three thousand reindeer, being driven across "the top of the world," into Canada, on the order of the Dominion Government, have halted their long march in the Hunt and Colville River section until the end of the fawning season.

The herd will wait there until the new-born deer are strong enough to join the drive, which follows a route north of the Arctic Circle across Alaska to the Mackenzie River basin, of the Canadian Arctic.

Heart and Nerves

Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

What's In a Name?

Not Very Much As Proved By Book Publishers

The answer to the question, "What's in a name?" seems to be clearly defined as the result of a questionnaire recently sent out by a firm of book publishers in an endeavor to ascertain what sells books.

The 10,000 replies received to date show that only 199 purchased the books because of their titles. More than 3,450 were attributed to reviews; 2,460 to advertisements and so on through the recommendation of a friend, reputation of the author, bookstore display, interest in subject, gift, lecture or sermon, with the title at the bottom of the list.

Feebly, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

According to an English weekly paper, the police always stop the traffic to let Mr. George Bernard Shaw cross the road. The idea of stopping Mr. Shaw to let the traffic pass is said to have been abandoned years ago.

Pope Pius Has Gold Telephone

Instrument For Personal Use Is Ornamental With Mother-of-Pearl

The Pope's small state of 500 inhabitants soon will have what is probably the greatest proportion of telephones to population in the world. With the installation of a new system there will be 800 numbers, of which 600 shortly will be in use.

Pope Pius' personal telephone will be of massive gold, bearing the Pontifical seal and ornamented with mother-of-pearl. He will be able to telephone anywhere without his call passing through the exchange. Special private lines also will be installed for the Secretary of State and other dignitaries.

THE REASON WHY

Thin Weak Children Need Baby's Own Tablets

Malnutrition or inability to derive nourishment from food, is a common trouble with little children and is entirely due to stomach and bowel weakness. Another cause of loss of flesh and sleep is worms.

To correct stomach and bowel troubles and thus banish constipation and indigestion, break up colds and simple fevers; expel worms and allay the pain which accompanies the cutting of teeth is what Baby's Own Tablets were designed for. They never fail to be of aid and can be given with safety to the youngest babe.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Good Revenue From Map Sale

One hundred and fifty-one maps of Canada have been made by the topographical survey since 1917, according to House of Commons recently, and the cost of compiling these maps was \$800,500. The largest area surveyed was in Manitoba, where 98,247 square miles have been surveyed. The revenue derived from the sale of these maps since 1924 amounts to \$16,590.

Use Minard's for Burns.

How They Saw It

Two elderly ladies arrived in the New York Grand Central Terminal the other evening and caught sight of the airplane taken up on the balcony. This was apparently their first view of an airplane at close range. They studied it for a while in awed silence, then one of them spoke, in the accents of discovery, "It's built on the plan of a bird," she said.

Western Province Benefits

Will Collect Succession Duties On Estate Of English Baronet

Revenues of the province of Saskatchewan will benefit to the extent of \$14,331 by way of succession duties on the estate of Sir John Lawrence Langham, Bart., who died recently in London, England, and whose will is now being probated. Sir John left \$1,000,926, of which \$277,952 is in Canada, \$193,652 in Alberta, and \$54,300 in Saskatchewan real estate. The Saskatchewan property under the Succession Duty Act of the province, will be taxed at the rate of 17 per cent.

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment, the quick, sure remedy. Saves time and expense. Prevents blemished stock.

Paris has restricted automobile parking in the central area to thirty minutes, and physicians have banded together to ask for exceptions of this hampering regulation.

EVERY BIRD LOVER should have this new revised edition of Brock's Book on Birds—complete with 342 pages of valuable information on the care and feeding of caged birds; also enlarged (8 pages) of practical advice on the treatment of bird diseases.

The regular price is 35 cents, but to readers of this paper who order 25 cents, addressed to the WINNIPEG STEVEDOR UNION, DENNETT AVENUE, EAST, WINNIPEG—a copy of Brock's Book on Birds will be sent along with a generous sample of Brock's Bird Seed, carefully balanced and prepared from the finest seeds, selected from all parts of the world, together with a real treat for your bird, a sample of Brock's Bird Food, which brightens the plumage and strengthens the song.

Canadians Have Much To Learn About Vast Empire Being Developed In North

So vast is the Canadian heritage and so numerous are the points offering promise of great and continuous development, that it is difficult for the most assiduous of newspaper readers to keep in touch even with his own province. For more distant information he is dependent on remoter sources and therefore has all the more reason to appreciate editorial and other articles outlining what is being done in districts that are only in process of being opened to the light of day. Recently the Lethbridge Herald touched on the development of the Alberta Northland and remarked that as this is proceeding so British Columbia's great field of land east of the Rockies is coming in for a lot of attention. Speaking recently about the potentialities of this region it quoted Hon. F. P. Burden, Minister of Lands of that province, as saying that the section had one of the best bodies of coal on the continent, and according to coal authorities it was the only coal on the continent that would smelt without coking.

In close proximity, Mr. Burden said, was a great body of iron ore. In years to come, he believed, a great steel and iron industry would be developed and would create a big demand for the agricultural products of the district.

There were also other minerals, the minister said, and possible hydro-development at low cost. The Herald repeats its view previously expressed that in the vicinity of the head waters of the Peace River, and where they cut through the backbone of the continent on their way to the Arctic, there is a veritable empire of wealth such as few Canadians even dream of. Here are to be found valuable commercial timber and pulpwood. The Groundhog confided in which the late Lord Rhonda was interested lie in that area. Close by there are said to be mountains of iron, while it is also stated that mines as rich as the Sullivan at Kimberley may be developed. And with it all there is, in the Peace River Canyon, water power capable of developing within a 12-mile stretch something like 1,500,000 horsepower. While there is so much talk of a coast outlet for the Peace River country, it is well to bear in mind that the development of this mining, lumbering, pulpwood and hydro power potentialities along the Peace River head waters, is practically certain to open up a route through the northern section of British Columbia. Somewhere along the course of that route will be a railway, and situated upon it, close to the Pacific, and closer to the Orient than any other British Columbia city, will be a modern city founded upon the wealth of resources in that area.

We really know very little as yet, the Herald says truly, about the great northland which, in a few years, will be pouring its treasure into the world's markets and bringing back new wealth to Western Canada.

Curious Custom In Ceylon

At a funeral recently of a native near Colombo, Ceylon, friends brought many gifts to the corpse. Each had something different, including cooked meat, fruits and liquors. As the coffin was conveyed to the burial place on a huge pink and white structure resembling an ice cake, the gift-bearers accompanied it in solemn procession.

Increase In Plant Imports

Canada Bringing In Large Number For Parks and Gardens

Canada's appreciation for the aesthetic in parks, garden and amateur horticulture is reflected in the amazing increase which is reported in the importations of trees, shrubs, roots, perennials and bulbs. In 1919 the Plant Inspection Service of the Dominion Department of Agriculture examined 800,000 plants, etc., at ports of entry, while in 1928 the number examined was over 48,000,000. Inspection stations are maintained at Halifax, St. John, Quebec City, Montreal, Ottawa, Toronto, Niagara Falls, Windsor, Winnipeg, Estevan and Vancouver, where imported plants are examined to ensure freedom from insect pests and plant diseases.

(By Anabelle Worthington)

3279

Ideal interpretation of wrap-around with drapes at side that combines with the surplus bodice that fastens at hip with buckle, to give the figure graceful length. The normal waistline is indicated by seaming which makes the light fit through the hips and moulded line of bodice more prominent. The neckline with surplus vest is unusually becoming fashion.

Style No. 3279 is distinctly smart in novelty silk and wool crepe in dark plum tones. The shawl collar is of plain faille crepe in blending tone, while the vest chooses white pique.

It is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. It's a model that makes up most attractively in crepe satin for the two surfaces can be nicely worked out for contrasting effect. The dark brown shade is especially popular.

Black silk crepe with eggshell vest is chic for all-day occasions and is favorite with smart women.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

R. S. McLAUGHLIN

President of General Motors of Canada, Limited, and one of the outstanding industrial figures of the Dominion, who was added to the board of directors of the Canadian Pacific Railway Company at the annual meeting of shareholders held early in May. Mr. McLaughlin is also vice-president of the General Motors Corporation of the United States.

University Is Loser

Alberta Regrets Removal Of Professor A. L. Burt To Minnesota

Anyone who went through the class-rooms of Professor A. L. Burt, of the University of Alberta, or heard him speak in public, will regret to hear that he is going to the University of Minnesota. For seventeen years, except for a period of war service, Dr. Burt has been at Alberta. He graduated from Toronto, and was a Rhodes scholar. Paying tribute to him, Dr. R. C. Wallace, president of the University, said: "He has established his position in a very notable way with the students of history in the University, and his books and other contributions to the field of history have given him a place in the world of accurate scholarship." Prof. Burt's "The Romance of Western Canada" was published this year.

Settlers Are Keeping Ahead Of Railways

District In Northern Saskatchewan Rapidly Filling Up

Settlers are still keeping far in advance of the railway in the opening of the north.

For the past 10 or 12 years good crops have been grown in the Meadow Lake district, 100 miles north of North Battleford, and the growers have hauled their grain 60 miles to the nearest railway line.

This year the Canadian Pacific Railway is building a line through the Meadow Lake area but Meadow Lake is no longer the frontier town.

Every week hay-racks containing settlers' effects are to be seen ferrying the Beaver River, 20 miles north, making for a district on the other side which is rapidly filling up.

Department of Agriculture Is Studying Problems of The Ranching Industry

The following article was prepared at the direction of Dr. J. H. Grisdale, Deputy Minister of Agriculture, by Mr. E. Archibald, director, Dominion Experimental Farms, Ottawa.

Previous to 1912, when the beef cattle industry in Canada was in a thriving condition, a very small investment, outside of that in cattle, was necessary to carry on the business. With the coming of the settler, and the consequent splitting up of the open range, the rancher was confined to a definite area. This change necessitated a more economical use of the range and the construction of fences, the development of watering places, and the production of winter feed. With these increased costs more attention was paid to the class of cattle raised, the percentage calf crop, and the death losses. Although the best known grazing practices were followed there was a decline in the carrying capacity of the ranges, and many areas became badly overgrazed. The result was depleted pastures, less thrifty cattle entering the winter, and sub-normal gains in weight by marketable and breeding cattle.

It was not until 1925 that a demand arose for experimental work on the range, and following a survey in 1926, by the Dominion Experimental Farms, Department of Agriculture, it was decided to conduct experiments on the short grass plains to study methods of range management, with the object of improving the carrying capacity. As the outright purchase and equipping of an experimental ranch appeared to be unwise because of the large cost involved, it was decided that it would be more economical and more useful to co-operate with some rancher who had a long experience in ranching. Gilchrist Brothers, of Medicine Hat, Alberta, offered their co-operation, which was accepted and the experiments are now being carried out on this ranch.

The main project under investigation is known as the deferred and rotation system of grazing. It is usually carried out on three pastures, depending upon the conditions under which it is practised. The system is designed to defer grazing on each pasture twice in six years to allow each pasture to mature a crop of grass. On the station, four fields, each comprising 3,140 acres, are used to determine the practicability of the scheme. The fourth field is grazed continuously and serves as a check on the other fields. In order to determine the efficiency of this system of grazing as a whole and whether or not the grass cover is improved, a thorough study of all factors affecting it is made.

An essential factor in range management is a reliable water supply.

In this connection the development of natural watering facilities is being investigated. Other factors in range management being studied include the use of salt, the gains in weight by different classes of cattle, the possible limits of the grazing periods, the palatability and nutritive value of the range vegetation, the question of deterioration in the feeding value of hay kept several years in reserve, and the effect of frequent cutting on range hay production. As fencing occupies an important place in the ranch operations, the use of wood preservatives for the posts and cost of construction and maintenance are also being investigated.

In addition to the projects at the range station there are several other investigations being conducted in Alberta, Saskatchewan, and British Columbia, including an economic study of the vegetation, reseeded tests on burnt-over land, and a number of trials in the growing of forage crops for winter feeding. A beginning has been made on the study of the cost of production of range cattle in the different grazing areas, the object being, first, to learn the financial importance of different factors in the cattle business; secondly, to present a fair picture of the industry, and thirdly, to analyze the business for the purpose of learning which are the most profitable range practices to follow in the different localities.

New projects to be studied during 1930 will be the determination of the carrying capacity of the range land on the short grass plains, the winter feeding of cattle, the use of home-grown roughages and other economic value for hastening younger steers to maturity, and the value of supplemental feeding to cows on winter pasture.

When more complete information is available on summer grazing, winter feeding, and on cost of production, a fairly complete knowledge of all phases of the cattle industry will be available.

Sweden Is Prosperous

Has Small Population But Is Very Progressive

Sweden, which has a population less than that of London, is one of the most prosperous of European countries. Though only a third of the small population lives in towns, Sweden is remarkably go-ahead in all matters of art—the drama, architecture, and so on. The Town Hall of Stockholm is one of the finest modern buildings in the world. There was a time when Sweden made a great stir in the affairs of Europe, when, united in national resistance to the encroachment of her neighbors, she waged war on Germany, Russia and Poland; her standards were raised in Munich, Moscow and Warsaw. These were the days of Gustavus Adolphus, Charles XII and eccentric Queen Christina, who dressed as a man and died a pauper in Rome. Today things are otherwise. The country has a great past and a most contented present—which is the best we would desire for any nation.

Jinks—"Have you ever lost your temper before your wife?"
Binks—"Now, she beats me to it every time."

"It is the master! But where is his car?"
"Did he have his car with him?"
"We wondered why he kept asking us to shut the window as we dragged him home."—Fliegende Blätter, Munich.

High-Class Poultry and Eggs

Believe it or not this picture represents \$700 worth of high class poultry and henfruit. Not many of them, it is true, but these hens are worth about \$50 apiece while the three roosters retail at the market price of \$100 each. The shipment is part of a big order being filled by the Record of Production breeders in co-operation with the University of British Columbia for poultrymen in the Hawaiian Islands, China and Japan. Each hen in the shipment has a record of more than 300 eggs per year, while the roosters also have imposing records. The shipment left Vancouver recently aboard the Canadian Pacific liner "Empress of Canada," for Honolulu.

WRIGLEY'S

When you need new energy, when you are hot and mouth is dry—pep up with Wrigley's—it moistens mouth and throat.

The increased flow of saliva feeds new strength to the blood, you can do more—you feel better.

WORLD HAPPENINGS BRIEFLY TOLD

William J. Locke, widely known British novelist, died in his Paris home, May 19, after a long illness. He was 67 years old.

The Federal Government is seriously considering a proposal strongly advocated by Hon. D. G. McKenna while here—the granting of pensions to the blind.

Through the British embassy at Warsaw, Poland has accepted an invitation to send an official representative to the World's Grain Exhibition and Congress to be held in Regina in 1932.

Max Valter, German pioneer in experiment and research with rocket motors, was fatally injured while working on a model of a new liquid oxygen rocket. A piece of the recoil motor blew out and struck Valter in the neck. His jugular vein was severed.

THE ANAEMIC GIRL

Who Has Lost Her Charm and Beauty

"She seems to be losing her looks." This remark is often heard about girls who were once noted for their sparkling eyes. The cause is not far to seek—they have become anaemic; that accounts for the pallor and the loss of charm. The anaemic girl, if she neglects her health, may be a sufferer all her life.

Take heed, you pale, anaemic girls. Plenty of fresh air, nourishing food and rest will help you, but what you need most is good blood. Those wretched headaches, that fickle appetite and those terrible heart palpitations can only be banished if the blood is rich, red and pure.

Good blood—the kind that brings good health is created by Dr. Williams' Pink Pills. The whole mission of these Pills is to build rich, red health-giving blood. The Pills are sold by all dealers in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Preference From Bermuda

A reference to Canada on agricultural produce and on fish has been granted by Bermuda, according to a telegram received by the prime minister from the Hon. R. Black, Speaker of the Legislative Assembly of Bermuda.

Campers Carry Minard's.

New Use For Wheat

Light Crop Can Be Made Profitable By Feeding To Poultry

With the present uncertainty which prevails in the wheat market the Dominion Department of Agriculture finds that farmers are paying more attention to the marketing of grain crops through live stock. Some important and interesting results have come to light, and not the least interesting is the experience of an Alberta farmer who had a light crop which he could not sell at the elevator. He had a flock of poultry and started feeding the wheat to them and marketing it in the form of eggs through the local egg pool. When the winter was over he figured up his costs and found that he had sold the wheat thus fed at an average price of \$5 per bushel. Another western farmer with a modest flock of 150 birds kept his family throughout the winter on the income from the eggs, and he states that his gross income for the winter from the flock averaged \$200 per month.

It Bids Pain Begone.—When neuralgia racks the nerves or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish facts for it.

(By Annabelle Worthington)

The tailored one-piece frock in printed wool crepe lengthened with a kilted plaited fascia is a copy of an elder frock of sports character. It has a crisp pique collar and is belted at normal waistline. Inset pockets are placed at either side below the waistline. Style No. 3269 is as comfortable as it is smart, and so easy for the little miss of 8, 10, 12 and 14 years to slip into in the morning for classroom. It is suitable for many of the season's new fabrics, as tweed in brown and yellow with check pattern with yellow pique collar, wool jersey in hunter's green, covert cloth in deep maroon red shade, knitted jersey weave in horizontal stripes in orange and blue tones with stripes reversed for kilted flounce or skirt and orange-red sportswear linen with white collar and trim. Tweed-like cottons, printed pique, crepe de chine, plain and checked gingham and wool challis prints appropriate. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Heal the Sprain with Minard's.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved. Take Carter's Little Liver Pills after meals and neutralize the acids. Sweeten the sour and acid stomach, relieve the gas and encourage digestion. The stomach and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Plan To Encourage Community Progress

Canadian National Railway Will Give Prizes For Competition

Plans which seek to provide a substantial contribution to the encouragement of community progress and development, and the attainment of the fullest possible measure of Canadian citizenship by those rural communities in Western Canada which are of European origin, have been developed by the Canadian railways according to an announcement just made by Sir Henry Thornton from the head offices of the railway company at Montreal.

These plans initiated and developed by Dr. W. J. Black, director of the Departments of Agriculture and Colonization, of the National System, involve the carrying out of a series of competitions among such communities in the three provinces, Alberta, Saskatchewan and Manitoba, to be held annually for a period of five years, for which one set of three prizes will be awarded in each province each year. These prizes will be substantial. The first will be \$1,000, the second \$500, and the third \$250, and they will be awarded on the understanding that the money be utilized in community work of some progressive nature. It is planned to have the competitions commence this year.

The Departments of Agriculture and Colonization, of the National Railways, will assume the responsibility of conducting the competitions, but hearty co-operation and support in the carrying out of the entire scheme has been offered by various departments of the provincial governments which have chiefly to do with matters of rural community progress and welfare. Leading men and women in western life also indicated that the project has their support and approval. For the judging of the competitions in each province, a committee of three outstanding citizens will be selected.

It is proposed to confine the competitions to rural municipalities, or groups of school districts within municipalities in which the population is made up of people of continental European origin, first or second generation. It is recognized that the interest which these people take in co-operating to make effective the policies of such departments of government as have to do with agriculture, education and public health, may be regarded as an index of the people to the advantages of what the Dominion provides towards influencing their status as good citizens. It has, therefore, been decided that emphasis shall be placed upon the things which these departments regard as of greatest importance. Consideration will be given to such matters as percentage of school attendance, efficiency of the school, percentage of young people attending secondary schools, colleges or universities, evidence of interest in matters relating to public health and social welfare, percentage of membership in farmers' organizations, such as the co-operative marketing pools, agricultural societies, women's institutes, etc., and evidence of general progress towards improvement of agriculture methods, throughout the particular community or area involved. Special consideration also will be given to evidence of com-

munity interest in music, arts and handicrafts. In respect to all this, the competitions will take into consideration the full calendar year and awards will be made at the end of each year. In discussing the project, Dr. Black said: "It is recognized that the people in a great many of the communities of European origin in the prairie provinces of Canada, have been showing an exceedingly fine interest in making full use of the facilities and influences which our Canadian institutions provide in agriculture, education and otherwise. It is the desire of the railway company, in undertaking to direct these competitions for a period of five years, to give encouragement to such communities as are showing a determination to make use of and emphasize to the fullest extent the best that our country provides in the development of citizenship."

SUNDAY SCHOOL LESSON

JUNE 1

CONTRAST BETWEEN FAITHFULNESS AND SLOTHFULNESS

Golden Text: "Well done, good and faithful servant: thou hast been faithful over a few things; I will set thee over many things; enter thou into the joy of thy lord." Matthew 25:21.

Lesson: Matthew 25:14-46. Devotional Reading: Psalm 40:1-8.

Explanations and Comments

The Commission Received, verses 14, 15.—The situation as regards the Kingdom of Heaven, said Jesus in the parable of the talents, is comparable to that of a man who, about to go to another country, calls to his servants and delivers to them his goods. In the interpretation of the parable, the "man" represents Christ; his "goods" all possessions—life, physical and mental powers, etc.—which are represented as God's property; entrusted to men, His servants, as a loan.

The Commission Carried out, verses 16-18.—The one who received five talents lost no time, but straightway went and traded with them, and made other five talents. In the manner he that received two talents doubled them. But he that received the one talent hid it and did it in the earth. It was a common practice in the East to bury money for safekeeping, but his lord wanted increase as well as safety.

The Faithful Ones Rewarded, verses 19-23.—The one who returned and made a reckoning with his servants. The one who doubled his five talents he recommended in these words: "Well done, good and faithful servant; thou hast been faithful over a few things, I will set thee over many things."

The Slothful One Punished, verses 24-30.—"Lord, I knew that thou art a hard man," (austere man, Luke 19:21), said he who had received one talent, "because thou didst not sow, and gathering where thou didst not scatter." He uses proverbial expressions, "because thou didst not sow, and gathering where thou didst not scatter." He uses proverbial expressions, "because thou didst not sow, and gathering where thou didst not scatter." He uses proverbial expressions, "because thou didst not sow, and gathering where thou didst not scatter."

The Judgment, verses 31-46.

Persian Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderfully invigorating. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a perfume oil to lovely complexion. Used by men as an effective hair cream or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

London's Privilege

A privilege which belongs to the City of London is that its maces and its sword may be carried upright. This privilege was granted to the city in 1354, and where other corporations stop their maces and their swords, the City maces may be carried upright, and the City swords generally are so borne, in the same way as the State sword is borne before the King, as an emblem of sovereignty.

Market For Salt Increasing

The Canadian production of salt except for small exports is sold in Canada principally to the dairy, meat curing, fisheries, and chemical industries, and as table salt for household use. The market for salt in Canada is steadily increasing.

Planning New Dirigible

British R-102 Will Be Faster and Larger Than the Others

Britain shortly will build a third giant dirigible for regular trans-Atlantic service, it became known. The ship will be called the R-102; the others being the R-100 and R-101. It is to be larger, faster and more economical than the others.

The plans for the R-102 were said to be in the hands of the designers.

London's Moving Stairways

Will Be Speeded Up To 150 Feet a Minute

The moving stairways connected with London's famous shopping arcades are to be speeded up. At present this speed is 90 feet per minute. Experiments are being made with a stairway travelling at 150 feet a minute. Regular passengers who nip on and off the escalators with agility, would be glad to have them go faster, but the many who still regard them as perilous innovations will be more inclined than they are now to use the omnibuses.

Miller's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms breed, and at the same time, they are subtle and drive them from the system in their effect upon the digestive organs, restoring them to healthful operation and ensuring immunity from further disorders from such a cause.

As the Scots Said

The news that Weithalwei is being relinquished by Britain to China may recall to a few old-timers PUNCH's cartoon of more than thirty years ago, showing two aged Scots engaged in the following dialogue: "First Scot: 'Ah see we hae Weithalwei.' Second Scot: 'Hae we? First Scot: 'Aye, hae we.'"

No Asthma Remedy Like It. Dr. J. D. Kellogg's Asthma Remedy is distinctly different from other so-called remedies. Weithalwei so it would not have continued its great work of relief until known from ocean to ocean for its wonderful value. Kellogg's, the foremost and best of all asthma remedies, stands upon a reputation founded in the hearts of thousands who have known its benefit.

Deadly War Weapon

A new war weapon is being constructed secretly in England. This is a giant airplane torpedo, operating without a crew, its engine and course controlled by clockwork and its hull a mere receptacle for bombs. The control is set and on arriving at the appointed moment, the engine stops and the machine crashes to earth with its deadly load.

Reclamation of 1,096 square miles of land of The Pas, Manitoba, is planned.

Italy has American talkies.

First-Aid

For all pains and aches, foot troubles, cuts and bruises, for general massaging purposes, Minard's simply can't be beaten.

HOUSE UNITED IN ENDORSING PENSIONS BILL

Ottawa, Ont.—The government and the opposition united in expressing appreciation for the work of the parliamentary committee on pensions, when the bill to amend the pensions act was before the House of Commons in committee. The bill is to give legislative effect to the recommendation of the pensions committee decided upon after a lengthy enquiry into the claims of organizations of returned men for more generous treatment. The bill passed the committee stage quickly, and was then given third reading. It now goes to the senate.

When he arose to explain the bill Hon. Dr. J. H. King, Minister of Pensions and National Health, praised the work of the committee. He felt that not only would the returned men, but all the people of Canada, be pleased with the work which had been accomplished and highly appreciative of the untiring efforts of the members of the committee. The report of the committee had been unanimous.

The bill revises the machinery for dealing with appeals of soldiers from the pensions board. It provides a veterans' bureau to prepare the cases for soldiers. An important change gives a veteran the advantage when there is a reasonable doubt as to whether his incapacity was due to war service.

Congratulating the committee on the patient consideration and expert knowledge brought to this important question, Hon. R. B. Bennett said its members were entitled to the thanks of the nation. The committee was composed of men with first hand experience of soldiers' problems. He especially praised the chairman, C. G. Power (Liberal, Quebec South).

No difference of opinion existed among Canadian people, the Conservative leader declared, as to the pensions problem. They wanted a measure of generous compensation to all those who had risked their lives for this country. It assured the returned man the country was behind him, said Mr. Bennett.

There was nothing partisan in the bill or in the methods by which the committee had worked.

Will Arrange Rating

Bay Route To Be Brought Under Crown's Nest Agreement

Ottawa.—Hon. T. A. Crerar, Minister of Railways, stated that it is the policy of the Federal Government to enforce Crown's Nest agreement on the Hudson Bay Railway. The railway will be in operation one year hence, and Mr. Crerar said that he proposed to take immediate steps to discover what the legal position is. He will consult with the railway commission and find out exactly if Crown's Nest Pass rates automatically apply to the new route. If not, he will initiate action to bring the Bay route under the Crown's Nest agreement.

Canadian Minister Selected

Name Of Hanford MacNider, Iowa, Submitted To Government

Washington, D.C.—Hanford MacNider, of Iowa, has been selected by President Hoover as Minister to Canada.

His name has been submitted to the Canadian government and a favorable reply is expected shortly.

MacNider is a former assistant secretary of war, and a former national commander of the American Legion. His home is at Mason City.

Dry Ice Test Shipment

Brandon, Man.—Two cars of eggs of the Manitoba Co-operative Poultry Association were shipped to Montreal under the dry ice test. This means insulated containers are placed in the cars and that circulating carbon dioxide gas preserves the eggs.

Nansen's Successor

Oslø, Norway.—Prof. H. U. Sverdrup, of Bergen, Norway, has been named to succeed the late Dr. Fridtjof Nansen, explorer, as leader of the proposed Graf Zeppelin Arctic flight.

W. N. U. 1839

Considering Reverse "Rhodes Scholarships"

Would Permit English Boys To Attend Canadian Universities

Toronto, Ont.—Sir Robert Falconer, president of the University of Toronto, announces the establishment of a reverse "Rhodes Scholarship" is being considered by a committee of educationists to permit English boys to attend Canadian universities.

Dr. Cyril Norwood, chairman of the party of English schoolmasters which recently visited Canada, strongly advocated such an exchange of students, stressing his wish to see English boys specialize in economics and science. In praising the idea, Chancellor H. P. Whidden, of McMaster University, said, "I consider the point by Dr. Norwood, that Canada offers opportunities in the scientific and economic fields is well taken. One would have expected English students to study classics here when such excellent facilities are offered at Oxford."

Gen. C. H. Mitchell, dean of the University of Toronto, termed the scheme of "Reverse Scholarships" practical and feasible.

Conciliation Board To Settle Dispute

Dockers At Vancouver Wish Alterations In Renewal Agreement

Ottawa, Ont.—A labor dispute involving 1,100 water front workers in Vancouver and district is to be settled by a board of conciliation under the Industrial Disputes Investigation Act, Hon. Peter Heenan, Minister of Labour, announced. The parties involved are the Shipping Federation of British Columbia and some of their employees who are members of the Vancouver and District Waterfront Workers' Association.

The men wish the renewal of the agreement with the employers covering wages and working conditions which expired November 30, 1929, with certain alterations. Two members of the board of conciliation have already been appointed: R. E. Pirie of Vancouver, on the recommendation of the employers, and J. E. Hall on the recommendation of the employees.

Mr. Heenan is awaiting word from these two board members as to the selection of a third member who will act as chairman.

Change Will Assist Trade

Canadian Tariff Gives Many Advantages To British Manufacturer

London, England.—Hon. W. R. Smith, parliamentary secretary to the Board of Trade, said in the House of Commons, the changes in the Canadian tariff would affect business operations in a great many sections of the export trade of Britain.

Every effort was being made to assist manufacturers and traders to take advantage of their new opportunities, he said. While the department of overseas trade believed no practical purpose could be served by such a conference it would be glad to adopt the proposals of particular groups if they felt that consultation would be useful, he concluded.

Saskatoon Cadets Victors

Win Junior Shield In Dominion Rifle Shoot

Ottawa, Ont.—A youthful team of cadets of Nutana Collegiate Institute, Saskatoon, Sask., won the junior shield in the winter cadet shooting indoor series held throughout Canada under the auspices of the Dominion of Canada Rifle Association. A report issued from headquarters of the association shows the Saskatoon cadets compiled a high average of 97.11 out of a possible 100. The Quebec Seminary team won the senior cadet shield with a shooting average of 98.80.

Germany Contradicts Report

Berlin, Germany.—A statement was published here from the Chinese north coalition by way of London, England, that the French authorities of Indo-China have intercepted a consignment to the Nanking government of poison gas, which it was clearly intimated, came from Germany. The German foreign office, declaring it absurd anti-German propaganda.

NEW POET LAUREATE

John Masfeld, some time sailor and vagabond, who has been appointed poet laureate of England. The poems "Dauber" and "The Everlasting Mercy," and novel "Sard Harker" are among his better known works.

Wants Public Represented

People Interested In Veterans' Allowance Act Says Major-General MacDonnell

Ottawa, Ont.—Criticism of the plan to appoint the commission to administer the Veterans' Allowance Act wholly of returned men was made by Major-General A. H. MacDonnell, a member of the Senate committee investigating the bill. Dr. J. A. Amyot, Deputy Minister of the Department of Pensions, informed the committee it was the intention to appoint veterans to the committee.

General MacDonnell did not contend that returned men could not fill the offices, but he believed the general public should be represented as well. County judges could be utilized, he suggested, and they would bring to the committee experience that the majority of returned soldiers lacked.

Toronto Man Killed When Parachute Fails

Was Making First Attempt To Jump From Aeroplane

Toronto, Ont.—Attempting his first parachute jump from an aeroplane, Kenneth Burgess, Toronto, was killed when the parachute failed to open. The aeroplane was at an altitude of 1,500 feet when Burgess jumped. The unopened parachute caught on a tangle of telephone wires, hurling him into the ditch. He was alive when picked up and a doctor was summoned, but he died a few minutes later. The aeroplane was a Colonial Airways machine, which left the company's field near Dufferin Street in North York Township.

Burgess is survived by his widow and two children.

Suggest Advisory Board

Commission Would Help To Solve Problem Of Immigration

Ottawa, Ont.—Establishment of a permanent advisory commission on immigration, on lines similar to the tariff board, was one of the many suggestions dealing with the immigration problem at the annual meeting of the Canadian Political Science Association here. The suggestion was made in a paper by Prof. W. B. Hurd, of Brandon, Man.

In his opinion the regulation of immigration was a matter for scientific economists and sociologists, rather than politicians. A commission could make a continuous examination of employment and social conditions throughout Canada and could give expert advice to the governments on the number and type of immigrants which could profitably be admitted. Persons interested in securing immigrants for any district would have to make application before the commission adducing evidence of an economic rather than a sentimental character.

Naval Agreement Is Attacked By Admirals

Places Their Navy In Inferior Position Says U.S. Officers

Washington, D.C.—Two more admirals told senate committees that the London naval treaty would leave the United States in a position of inferiority.

Rear Admiral J. V. Chase, of the General Board, said the pact did not represent parity with Great Britain, and had many other flaws from the viewpoint of a navy man.

Although he was an adviser at the London conference, Rear Admiral J. R. P. Fringle said, he was consulted but once by the United States delegation. He advised the delegates against the cruiser arrangement they finally accepted.

Japanese Immigration

Ottawa, Ont.—Two hundred and thirty-four Japanese immigrants have been admitted to Canada since September 1, 1928, up to the end of the last fiscal year, according to a return tabled in the House of Commons. Of these 130 were males, and the balance females. Fifty-eight were agricultural workers, and 56 were domestics. The remainder were children. Only 50 Japanese are permitted to enter Canada annually.

No Press Men On Dirigible

London, England.—The only press information that will be given respecting the R-100 flight across the Atlantic will be that kept by Wing Commander R. E. B. Colmore, who will release it on the craft's arrival in Canada. On the return trip Canadian and British newspapermen will be carried.

Jolly Beggars Broadcast Joy

"The most truly poetical of all Burns poems," said Thomas Carlyle, "is one which does not appear in Currie's edition, but has been often printed before and since, under the humble title of 'The Jolly Beggars'."

With music revised, arranged and orchestrated from the edition of 1818 (harmonized by Bishop) by M. Wood Hill, in collaboration with J. Campbell McInnes, "The Jolly Beggars" was presented as a ballad-opera by the Alfred Heather Light Opera Company, in the Canadian Pacific Railway's programme of music from station WJZ and twelve associated stations of the National Broadcasting

Company, from 9.15 to 9.45, Eastern Daylight Saving Time, on Sunday, May 18.

The following artists took part in the programme: J. Campbell McInnes as "the Narrator" (Robert Burns); Finlay Campbell as "A Maimed Soldier"; John Detweiler as "A Thinker"; Mrs. Davies Wynne as "The Widow of a Highland Freebooter"; Poole Nancie; Alfred Heather as "A Bard and Ballad Singer"; and Jean Haig as "The Soldier's Lass." The first song of this opera is of special interest as containing a reference to Canada: "When the bloody die on the Heights of Ahran," referring to the battle between Wolfe and Montcalm.

NEW TARIFF ON FRUITS IS TO BE AMENDED

Ottawa, Ont.—Amendments will be introduced to a number of items in the tariff resolutions affecting fruits and vegetables. Hon. C. A. Dunning, Minister of Finance, announced in the House of Commons. The changes will apply to products which under the new schedule have ad valorem as well as specific duties. The specific will be made to apply only in those seasons of the year in which foreign importations come in competition with Canadian grown fruit and vegetables.

The announcement of the finance minister was greeted with applause by the Conservatives who expressed the opinion that he has become a convert to the seasonal tariffs they had been advocating.

When the uproar had quieted, Mr. Dunning explained that the decision to limit the specific duties to certain seasons instead of the entire year had come as a result of conferences with the fruit and vegetable growers. They had expressed willingness to co-operate in this connection. He did not promise that the seasons would suit all the growers from the Atlantic to the Pacific because of the many differences as to the dates when such products are marketed here, but an attempt had been made to deal as fairly as possible with all.

The House spent the entire day on budget resolutions, and some progress was recorded. The tea item, as amended by the budget, was finally approved. Under this item tea produced in the British Empire enters Canada free under the British preference, and is subject to duty of nine cents, intermediate, and ten cents general.

Approval was also given to the resolution which declared that excise duties or taxes shall be disregarded in estimating the market value of goods for special duty, when these commodities come under British preference, or intermediate tariff. The resolution passed, however, only after protest by certain Conservative members that the Canadian silk industry would suffer through the admission of Japanese silks.

Ask Amendment Of Criminal Code

Christian Scientists Want Clause Introduced For Their Protection

Toronto, Ont.—A despatch from Ottawa to the Toronto Star, says that a bill introduced by the government to amend the criminal code, a change has been made at the request of Christian Scientists, in three sections, which deal with the obligations of heads of families, people in charge of the sick, and masters and mistresses of servants and apprentices under sixteen. It is explained the purpose of the section is to permit Christian Scientists to practice their beliefs without fear of prosecution.

The new sub-section which is suggested for the criminal code in this regard is as follows:

"Any obligation which may be involved in this section by the two preceding sections to supply medical or surgical attendance as 'necessaries,' or 'necessaries of life,' shall not apply to, or affect persons using or depending on prayer or spiritual means for the treatment of human ailments as an enjoyment or exercise of religious freedom."

Special Stamp Issued

Melbourne, Australia.—During a short and intensive campaign to assist the appeal of the prime minister of Australia, Hon. James Henry Scullin, for the growing of more wheat this year, the postal department has issued a special cancellation stamp bearing the words: "Grow More Wheat."

French Troops Leaving Rhineland

Frankfurt-on-the-Main, Germany.—Evacuation of the Rhineland has been officially started in this sector of the third zone of occupation. Heavy artillery, pioneer equipment and columns of troops are moving toward France in the final exodus which will strip the Rhine of French soldiery.

Notes of the Elections

Geo J Bryan, the Liberal Candidate, is pursuing the even tenor of his way—holding meetings practically every night, in the rural school houses, where good sized crowds turn out to hear the Liberal gospel.

Altho not very well known in this section, Mr McLeod comes highly recommended from his own district, both as a successful farmer and a very active worker in the interests of U.F. co-operation.

One of the nominees at the convention, in his ten-minute speech, explained in detail how a Lac Ste Anne strip of land had been annexed to Stony Plain constituency—when the final ballot showed we had merely been hitched onto Mr McLeod's balliwick.

Dan says this is certainly a tuff election on Auctioneers.

Brevet-Candidate H Lent was an interested onlooker at Friday's Convention proceedings in Stony.

Owing to the impassable roads to Drayton Valley on Monday, Mr Bray was unable to keep his appointment to hold a meeting at that place.

Having silenced firearms, Mr Maxim announces that he will next endeavor to eliminate noise in industry. And when he finishes that he might tackle politics, says an exchange.

'Tis the unexpected that always happens—results from political conventions not excepted. Rabbin Burns no doubt had events like Friday's in mind when he wrote: "The best laid plans of mice and men gang aft agley."

The high regard in which W M Washburn, ex-M.L.A., is held was shown by the way his friends in the Convention fought to the last ditch to have him re-nominated.

It is recalled that Mr Washburn had been a very lucky man at the two former U.F. conventions, beating J W Welbourn 11 to 10, in 1921; beating R J Manson 7 to 6 in 1926; only to meet his fate, in 1930, at the hands of a comparative stranger in these parts.

Candidate McLeod sure has a very efficient lieutenant in the person of Mr Malcolm McArthur. During the balloting and examining of candidates' credentials, at the Convention, he close-checked all moves he considered at variance with the Constitution.

A Texas paper says that down in Mexico they're not troubled for very long with lame political ducks. They shoot up all surplus political candidates before the election.

Railway Time Table

Going East—Every day except Tuesday at 7.01; every morning at 6.23.

Spruce Grove News

Messrs Forbes and Koffeberg were away on a fishing trip over the holiday and returned with the maximum catch.

And now it is Mr Schlang's turn to get a new car—a Plymouth, from Agent Bell.

The Grove's Scout footballers and Winterburn Scouts tangled in a game on the holiday, with the latter winning by 4 goals to 3. Two of the Grove's best players were absentees.

The Grove's Junior baseballers had a match date with Stony's Juniors on Sunday afternoon on local grounds, but the latter team failed to show up. Grove Juniors play at the Beach June 1st.

Mr and Mrs Joe D Miller were present, on Sunday last, at the marriage of Mr Miller's brother John, to Miss Mary Sauer.

The Grove's U.F.A. Local's nominee for a seat in the Legislature gave a good account of himself at Friday's convention, losing out on the second ballot by only one vote. His backers stuck to him to the last, and then are said to have given their support to Donald McLeod, who captured the convention.

Adherents of the Farmer Government attended the big meeting in Stony Wednesday night in a large body, when Premier Brownlee gave an address. Donald MacLeod, the U. F. candidate, will hold a meeting in Winterburn Hall Monday next June 2.

Old Game Has Lost Interest.

For several years past horse shoe pitching has been looked upon as the Grove's one game in which all local sports took a keen interest, and a number of the local players had become expert in making "ringers" and throwing their shoes so they'd hug the iron stick. A group of shoe enthusiasts opened the season as the days got warmer, and it was thought we were in for another hot time among the pitchers. But, sad to relate, interest in the game has fallen off very much of late, owing, it is claimed, to several having been bitten by the political bug.

CHAPTER XIV.—Continued

A year before there had been talk of building a main schoolhouse in the center of the town; but the plan had been abandoned because so many of the children came from farms outside the village that it would have been necessary to send a bus to collect them, and the old way seemed easier. Thus Charmin began her duties as teacher in the very room where she began her school days nineteen years before. The small, brick building was unchanged save for an impressive sign over the door which read, "Lincoln School." This replaced the battered, weatherworn board that had designated "District Four," and was a concession to the daring souls who declared that district schools had "gone out of fashion," and that Wickfield would be a laughing-stock

to the entire country unless some change in its educational system was made.

"You'd think to hear 'em talk," raged Deacon Purdie, who always flared into speech at any mention of spending money, either by the town, himself, or one of his neighbors, "that folks ain't dedicated! I guess what schools ain't dedicated! I guess what folks is raisin' these days. I caught that Eldridge boy makin' a—disgraceful—er—gesture at me the other day!"

"If he'd caught all the people who would enjoy doing the same thing," grinned Jimmy Bennett when Grandma related this piece of gossip, they'd reach from here to the district school that he's so keen about! The damned old hypocrite!"

But this time the deacon's faction had triumphed.

"If it hadn't," said Grandma regretfully when Charmin told her that the coveted "job" was landed, "it would be a slight easier for you, child. You'll have to start the cold, east part of the day to walk that distance. It makes me shiver just to think about it. I wish Ed Purdie had to walk it for you. He'd soon change his mind about whether young folks deserve a better school building!"

"Now don't begin worrying about next winter," laughed Charmin. "I dare say the exercise will do me good. I don't get half enough as it is now."

It was the first of August when Charmin was notified of her appointment. Other events followed quickly on its heels, the most astonishing of all being the Sunday morning when Deacon Purdie surprised the congregation by walking proudly into church followed by the blushing Luella (wearing the much-talked-of yellow beads) and her six little olive bronzes.

"I feel sort of responsible, chuckled Gam Garfield, who had stopped in after divine worship to talk the matter over with Grandma Davis. "I laid it on so thick about the cost of settling the thing by law, that I guess Edgar decided it would be cheaper to get hitched. Anyway, they went over to Eastboro yesterday afternoon and tied the knot. I haven't heard what bribe he used to make Luella change her mind, but she was simperting enough this morning to please any one."

"He might at least have given the wedding fee to Mr. Merry," complained Grandma. "What was the idea of going clear to Eastboro?"

"Search me," replied the little lawyer, throwing up his hands in an expressive gesture. "Maybe luck. Mr. Merry performed the last two ceremonies, and the brides up and died on him, as Lizzie Baker says. Any way, Grandma, that lets you out of any trouble. Now that he's nothing to gain by it, the deacon will never let it be known that you got the better of him in a deal."

Grandma laughed as she glanced from the windows.

"Here they come now!" she exclaimed excitedly. They must have gone to meeting the long way round, for I've been here every minute since breakfast and never laid eyes on 'em before. It looks sort of like a bridal procession, Gam, with all those children attendants! My stars! I should think even Luella Moore (and she's a fool if ever there was one), would know better than to give her babies such a stepfather. I pity the poor little things; but I suppose their mother is counting on Edgar's joining his other wives in Kingdom Come, seeing he's so much older, and then she'll come into the Purdie property. Just look at how Edgar strutted! He did the same when he married Emma Dodd, but with Carrie and Eva he was sort of drooping, they not being so handsome as his first. I don't suppose you know if Luella got on a new dress, Gamaliet?"

The lawyer shook his head. "That's beyond me; but here comes Charmin and the doctor. Perhaps they can supply the missing details." He arose as the girl and her companion entered, and said triumphantly: "I beat you to it, Charmin! Skipped out as soon as I decently could and made a home run with the news. We've just been watching the bridal party from the window."

"Doesn't it beat all?" cried Grandma. "Did Luella have on a new dress, Gamaliet? It looked to me like her old blue made over."

"I can't say," laughed Charmin. "I was far too thrilled watching the bridegroom to have any eyes left for Luella's raiment. The children spilled over into the Merry pew, Grandma, but they behaved well."

"I saw their new papa give one of 'em a dirty look when she dropped a hymn book," proclaimed another arrival who proved to be Jim Bennett.

"I got that, too," declared John Carter. "I wonder if any one in church can remember the text," he added with a quiet laugh. "The center of attraction was certainly not the minister."

"Well," said the old lady, "I've no doubt that Mr. Merry understood and made allowances. Probably he had considerable trouble keeping his own mind on the sermon. Mr. Merry is real human if he is a minister. Did you know if Luella had a new dress, Jimmy? I'd admire to find out."

"Mother said it was an old one, fixed up," replied Jim glibly. "Guess Edgar surprised the ceremony on his love so suddenly (considering their recent quarrel), that she didn't have time to visit her modiste."

Charmin giggled, while the doctor reproved her by saying: "I'm shocked at your levity, Miss Davis. This is a serious matter—to Luella."

"I'll say it is!" said Jim; and added, with a glance at the lawyer, "and it's cost you a good case, Gam. I'm surprised you should let such an opportunity slip through your fingers." "It was a sacrifice on my part," replied Gamaliet, sighing. "I did it, Jim, to save an old friend from getting into trouble."

"He's joking," nodded the old lady, "but there's a little of truth behind the joke. You'll get your reward in the next world, Gam, if you don't here. He's referring to a business transaction I had with the deacon, Jimmy," she explained. "I presume Charmin told you about it at the time."

"She did," grinned Jim. "My sole regret is that I wasn't behind the door with these precious eaves-droppers."

"Same here," asserted the lawyer, rising. "I'd have given ten dollars for the privilege of a front seat. Well, Grandma, I must run along or be late to dinner. Alf's well that ends well, and so long as Luella thinks she's adorning her beauty with some costly product of the Orient, why no harm's done. You going my way, Jim? I'll give you a lift."

"You're a dandy matchmaker, Grandma," remarked John Carter, as the callers departed and he took the chair beside her.

"Matchmaker!" echoed Grandma indignantly. "If I thought I'd had anything to do with giving those Moore children such a stepfather, I'd never rest easy in my grave. There goes George K. and Selina. They're waving. A nice couple if ever there was one, and successful, too. Selina can wear a silk dress every day if she wants to; but when they were married George K. was just beginning at the bank and earning less'n ten dollars a week. Now he's pres-

dent, and his three boys all went to college and are a credit to him and their mother. One of 'em writes poetry, and gets it printed in the magazines. I've always thought that if Charmin had more time she could be a writer. Once she wrote a real pretty piece about—"

"Grandma Davis!" reproved Charmin from the doorway. "I forbid you to boast about my youthful literary efforts. The subject is painful, and I haven't a doubt that the doctor wrote better ones himself in his early days."

"I can't vouch for comparisons," smiled the doctor, "but in my twelfth year I produced a masterpiece that caused a riot in the family. It began:—"

"The sun was setting o'er the battlements.
It shone on ladies and on gents. . . ."

"It was a ballad, dealing with love and covering six pages. My mother treasured it for years."

"Of course she did," said Grandma seriously, though her lips twitched. She giggled so, Charmin. You'll turt the doctor's feelings! Is dinner ready? I feel hungry after so much excitement; and I presume Lizzie Baker'll be over soon as she eats."

(To Be Continued.)

Little Helps For This Week

"Commit thy works unto the Lord, and thy thoughts shall be established."—Proverbs xvi. 3.

When first thy eyes unveil, give thy soul leave
To do the like; thy bodies but fore-run
The spirit's duty. True hearts spread
Unto their god as flows to the sun.

Give Him thy first thoughts to the
sun.
Him company all day, and in Him sleep.
—Henry Vaughan.

Every morning before we cross our threshold, before we make a single plan or appointment for the day, we must give ourselves unto our Father's business. We are not, as we sometimes do, to determine what we will do, and then devote it to God, but we are first to devote ourselves to God, and ask Him what we shall do.—Alexander McKenzie.

Man Without a Country

Sam Holovitch, Russian, who fought for Canada in the Great War, is officially a "man without a country." Though an alien, he is permitted his liberty, for U.S. federal immigration laws have tried thrice in vain to find a land to which they could deport him.

"After Baby Came I Was Weak, Skinny Gained 22 Lbs."

"After baby was born I was very weak, skinny. Since taking Ironated Yeast feed fine. Gained 22 lbs." — Mrs. Laura Elliott.

Thousands write new Ironated Yeast adds 5 to 15 lbs in 3 weeks. Ugly hollows fill out. Bony limbs get graceful roundness. Muddy skin gets clear and rosy like magic. Nervousness, indigestion, constipation vanish overnight. Sound sleep, new pep from very first day.

Two great tonics in one—special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in 3 1/2 time. No yeast taste, no gas.

So quit being "skinny," tired, unattractive. Get Ironated Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

Greenwich observatory in England dates back to the time of Queen Elizabeth.

Gyproc Makes Summer Homes FIRE-SAFE!

PROTECT your family by making your Summer home draft-proof, dust-proof and fire-safe. The new Ivory coloured Gyproc, that does not burn will render you this service at small cost.

Use it for structurally strong walls, ceilings and partitions. It needs no decoration (when panelled) but you can tint, paper or plaster it if you wish. It is easily and quickly applied, is a permanent asset, and is vastly superior to other building materials.

Your dealer's name is listed below. Ask him today for full information on Gyproc Wallboard or send for interesting free book "Building and Remodelling with Gyproc."

"Do Not Hesitate to Try It"

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the sample Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—Mrs. G. W. Postiff, 263 Haver St., Stratford, Ontario.

**Lydia E. Pinkham's
Vegetable Compound**

Mr. Hoadley's Address.

At the close of Friday's convention the Hon G Hoadley gave an address. He spoke of the candidate just chosen, Mr M. Leod, in very favorable terms and expressed the opinion that he would make an excellent representative for Stony Plain constituency.

The Minister produced several charts, one of these showing the indebtedness, income and expenditures of the province, as given out by the Auditor's Dept., and explained these in a very lucid manner.

Mr Hoadley read excerpts of editorials from recent editions of Calgary Herald and the Albertan, showing a faint criticism of the Brownlee government and merely asking for "a more powerful opposition" in the Legislature. He spoke of a young gentleman who is travelling through the constituency whose speeches show he is more enthusiastic than knowledgeable when it comes to discussing provincial affairs.

In dealing with the subject of Health, his answer to critics was that he had the interests of some 600,000 people in the province more at heart than the interests of some 400 members of the profession.

Mr Hoadley is one of the old timers of the Province and has experienced the hardships of the early days, of which he recalled a few. What had seemed like a prosy speech, at the beginning, eventuated in a heart-to-heart talk which found a responsive chord in the hearts of the pioneers present.

Town of Stony Plain.

NOTICE IS HEREBY GIVEN that the Town Council have decided to strictly enforce the Town Bylaw concerning cattle and horses running at large. Many complaints have come to their attention of cattle destroying merchandise left in rigs.

Anyone leaving cows would do well to obtain a permit from the Secretary of the town to tether out their cows on property in the Town; otherwise they are break ing the Bylaw.

JAS. MALLOCH,
Secretary-Treasurer.

Stony Plain and District

Messrs R and J Alton motored down from Edson this week.

Mr A E Michael returned Monday from a motor trip to Halkirk.

Mr and Mrs G W Shreeves, former residents, patronised the Mouse dance last Saturday evening.

Messrs W Rousan and Ph Enders motored to Fort Saskatchewan over the holiday.

The C N's Confederation train is now on its summer schedule. See railway time table.

A dance will be held at Muir Lake Community Hall Wed. next, June 4th.

Miller-Sauer

A popular wedding took place on Sunday last, when Miss Mary Sauer (daughter of Mr and Mrs Sauer) was united in marriage to Mr John Miller (son of Mr and Mrs Ph Miller). The ceremony was performed at the Glory Hills Reform church, by Rev C H Reppert, the pastor, and was attended by a very large number of the friends of this popular young couple. After the ceremony the bridal party motored to the residence of the bride's parents at Glory Hills, where a sumptuous wedding dinner had been prepared.

Calendar.

MAY—
29—Walther League Rally
31—Dance at Moose Hall.
JUNE—
3—Dance at Holborn Hall.
4—Dance at Muir Lake
9—Nomination Day, for Provincial legislators.
19—Election Day.

United Church Notes.

Last Sunday was Bible society day at the various congregations. Rev A Lyle of Calgary spoke at Spruce Grove and Brighbank and Rev J K Smith spoke at Stony Plain.

It is hoped that a special speaker from the conference will preach next Sunday. The conference is holding its annual sessions in McDougall church this week.

Holborn Happenings.

A dance will be held in Holborn Hall on Tues. next, June 3, in aid of a family who have lost everything in recent fire. Music by Barth's. The affair is under the auspices of U.F.A. and U.F.W.A.

A meeting of members of Wheat Pool will be held Sat. next, May 31. As a special matter will be up for discussion, all members are particularly requested to be present.

Edmonton Beach.

Edmonton Beach seemed to be the mecca of all pleasure seekers on the holiday, a record crowd being present in the afternoon. The basketball game and baseball proved attractive to the followers of sport. The Highlander pipers came in for a good deal of attention, while the Rainbow Toddlers provided the music in the afternoon and evening for those who wished to dance.

The basketball game resulted in a win for Stony Plain girls over Garden Valley by 4-2.

A very good exhibition of baseball was given by Winterburn and Walther League teams, the former winning, 15-10.

Sunday's rain storm kept the visiting crowd down to normal, although a few hardy motorists made the trip out from the City. The games billed for that afternoon had to be postponed.

June 1st, at 2 p.m., baseball game between Spruce Grove and Bright Bank.

Rolt H Rae, the big contractor who built up Nampayo av. Edmonton, has purchased a lot and will build.

Four League basketball games June first.

Here and There

(524)

The new hotel in course of construction for the Dominion Atlantic Railway at Kentville, N.S., will be completed this fall and is expected to open shortly before Christmas. It will replace the present Cornwallis Hotel while retaining the name, will have 100 bedrooms, ballroom and assembly hall, main dining room, rotunda, billiard room, card room and several offices, and will be a notable addition to the list of new and up-to-date hotels in the Maritimes.

No widespread or general depression exists in Canada, though several factors, notably the failure to market our grain and the loss in buying power resulting therefrom, have contributed to a slowing-up of traffic, declared E. W. Beatty, chairman and president of the Canadian Pacific Railway, addressing the shareholders of the company at the 49th annual meeting held early in May. He added that there was nothing of a fundamental character which should prevent the return of normal business conditions within the next few months. Mr. Beatty said, "We have all been hopeful that the first and perhaps most essential change both because of its psychological as well as its commercial effect, is the free movement of grain out of the country, would be in evidence during this or next month."

At the annual meeting of the Canadian Pacific Railway Company held early this month dividend of 2½ percent on common stock for quarter ending March 31 last, was declared from railway revenues and special income, payable June 30 next to shareholders of record May 28. R. S. McLaughlin, of Oshawa, president of General Motors of Canada, Limited, was elected to the board of directors.

Canada's new championship 18-hole golf course, the Royal York of Toronto, is scheduled to be opened officially March 10, when it is expected there will be a distinguished gathering of golfing notables present together with E. W. Beatty, chairman and president of the Canadian Pacific Railway, the organization responsible for the creation of the course. It has a length of 3,140; 3,370; 6,610 yards from the championship tees and a par of 35-37-73.

A bright Atlantic silver salmon, weighing 28 lbs. hooked on the Cain's River, April 28 last, by David Hayes, vice-president of the General Electric Company, Bridgeport, Conn., is regarded as the record spring run salmon ever taken by early anglers in New Brunswick. The party with Mr. Hayes landed 342 salmon, all of which, except some eaten, were returned to the water. "I never saw such good fishing," he said.

At the Calgary Bull sale held recently, the largest sale in North America at which bulls are sold singly, 53 bulls realized \$118,475, an average of \$227 each. Hereford were the sensation of the sale, 218 head bringing \$64,335, or an average of \$294.66 per bull.

"Lady Victorine," barred Plymouth Rock hen which last year laid 358 eggs in 365 days, a record, is this year being returned to maintain her position having laid 100 eggs up to April 15, and keeping up her average since that date.
